Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Tuesday 28 Mar 2023 until 23:59 on Wednesday 29 Mar 2023

Forecast Issued on Monday 27 Mar 2023 at 16:21

Confidence: High confidence for a return to milder conditions and wet and windy weather from the southwest. Low confidence in weather forecast towards the weekend especially wind direction and rain amounts. Also low confidence in amount of showers later in the week.

Headline for Tuesday 28 Mar 2023: A wet morning with heavy rain at times across the area and strong southerly winds, summit gales, becoming gradually milder during the day.

Mountain weather hazards on Tuesday 28 Mar 2023

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales Medium Likelihood	**Severe chill effect** Low Likelihood	**Poor visibility** Low Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** No Likelihood

Weather and chance of precipitation at 600m

Time							
00:00	03:00	06:00	09:00	12:00	15:00	18:00	21:00
Cloudy	Dull	Light rain	Heavy Rain	Heavy Rain	Heavy Rain	Drizzle	Cloudy
Precipitation probability							
<05%	20%	60%	80%	80%	80%	30%	20%

Forecast for Tuesday 28 Mar 2023

Weather: Mainly dry overnight but increasing cloud cover from the west with some light rain reaching the west around dawn. Rain spreads east during the morning and is likely to be heaviest around mid morning with some drier interludes in the west by late morning. Although the main band of rain clears east it will remain damp and drizzly for most areas in the afternoon with further showery rain possible, perhaps brightening up later in the evening.

Chance of cloud-free hill tops above 600m: 50% falling to 20% or less by mid morning as cloud lowers in association with the band of rain moving across the area.

Low cloud and visibility: Patchy or scattered low cloud layers above 600m in the early morning, mainly confined western hills at first. Cloud will thicken, lower, cloud layers above 2-300m by mid morning. Low cloud becomes extensive during the day with visibility becoming poor in rain and drizzle and navigation will be tricky at height. Some brighter spells may be found during the evening.

Meteorologist's View

Summit gales are likely for much of the day and with the damp conditions a significant windchill is expected. Turning milder as the day goes on but very poor visibility at all levels during the day.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 27 Mar 2023	0mm	12.2mm	23.4mm

Forecast for Wednesday 29 Mar 2023

Weather: Cloudy but mainly dry at first but cloud and rain spreading east in the morning with heavy rain at times. Dry for a time in the afternoon but further heavy showery rain expected later.

Maximum wind: Southerly 20 gust 35 mph perhaps increasing 40mph later.

Chance of cloud-free hill tops above 600m: 40%, cloud coming and going from the summits during the day.

Low cloud and visibility: Scattered or broken low cloud layers above 400m at times throughout the day, chance of some brighter conditions and cloud free summits in the afternoon but depends on the timing of showery rain.

Temperature: **Valleys:** Plus 11 Celsius.
At 600m: Plus 8 Celsius
Freezing level: Above all summits
